Education

The National Institute of Engineering, Mysuru 2024 – 2028
Bachelor of Technology in Computer Science and Engineering
CGPA: 9.38 / 10

BKG PU College, Sandur 2022 – 2024
Pre-University Course (Class XI & XII)
Percentage: 96%

Saint Paul's English Medium School, Gangavathi 2012 – 2022
Secondary School Education (Class I – X)
Percentage: 89%

Technical Skills

Languages: Java, Python, C, JavaScript, SQL

Web Technologies: HTML, CSS, Django

Developer Tools: Git, GitHub, VS Code, IntelliJ IDEA, Figma, Canva

Projects

DocuShield AI

- Implemented Error Level Analysis (ELA) to detect document tampering and generate forensic heatmaps.
- Performed metadata analysis using EXIF information, timestamps and software signatures.
- Designed tampering score generation by combining forensic evidence.
- Integrated forensic findings into document risk assessment and generated forensic risk reports.

JananiCare AI

- Developed an SOS emergency alert system connecting pregnant mothers with nearby ASHA workers.
- Implemented live location sharing for faster emergency response.
- Integrated voice-based symptom input for accessibility.
- Contributed to AI-based maternal risk prediction and health analysis.

GramyaAI

- Developed the complete frontend of an AI-powered interview platform for uneducated workers.
- Built an admin dashboard to store and manage interview details.
- Collaborated with teammates to improve accessibility and user experience.

Portfolio Website

- Designed a responsive portfolio showcasing projects, certifications and achievements.
- Integrated GitHub, LinkedIn and resume links.

Karnataka Local Food Finder

- Developed a web application to explore Karnataka cuisine by region and category.
- Implemented search and filtering functionality.
- Designed responsive webpages for an improved user experience.

Achievements

- 2nd Place – Astramind UI/UX Competition.
- 4th Place – Vibeathon Hackathon (JananiCare AI).

Certifications

- Coursera – Introduction to Front-End Development
- Coursera – Data Structures
- HackerRank – Python (Basic)
- Coursera – Linear Algebra

Relevant Coursework

Data Structures, Algorithms, DBMS, Operating Systems, Object-Oriented Programming, Software Engineering, Artificial Intelligence.
